

Dustcover Product Developments

New CLDC Standard Dustcover

The new CLDC 'Standard' Dustcover. For use with CLs & BLs, is functionally the same as our previous CLDC design but is now much more secure thanks to the addition of a robust clamp feature to grip the lock body, which replaces the four grub screws previously used.

Part number for individual orders:

Standard = **CLDC**

When ordering as part of a unit (i.e. BM2) part number:

BM2-CLIS = "S" Standard dustcover required

New PLDC Padlockable Dustcover

The New Padlockable Dustcover. For use with CLs & BLs uses the robust clamp feature as per the CLDC and also incorporates two padlock holes rather than just one as per previous designs.

This design accepts padlocks from 3-8mm and is complemented by our new range of lockouts. This improved compact size enables it to be mounted vertically and horizontally on multi-lock solutions.

Secured using a Security Pin Hex screw; compatible Allen key supplied.

Illustrated examples

1. PLDC with standard padlock
2. PLDC with LOH3 (Lockout Hasp)
3. PLDC with LOS3 (Lockout Scissor Hasp)

Part number for individual orders:

Standard = **PLDC**

When ordering as part of a unit (i.e. BM2) part number:

BM2-CLIL = "L" Padlockable dustcover required
